GAAKK RECIPE

Materials:

- Bottles of Elmer's white glue
- Box of Borax Booster (20 Mule Team Borax - get the smallest box you can find)
- Plastic mixing bottle (8 to 64 oz)
- Eyedropper
- Dixie cups (small size)
- Food coloring
- Stirring sticks
- Paper Towels

Directions:

Take the plastic mixing bottle and add about ½" of the Borax powder to the bottom. Fill bottle 3/4s full with warm water. Cap and shake vigorously. Let solution settle. You want a super-saturated Borax solution so there should be powder remaining on the bottom of the bottle after shaking. If there is not, add some more Borax and shake again.

Take a Dixie cup and fill about ¼ to 1/3 with Elmers Glue. Add a couple of drops of food color (optional). Take the eyedropper and fill with Borax solution. Add 5-10 drops to the Dixie cup and stir with stirring stick. Keep adding Borax until glue gets all “snotty” and excess liquid is in cup.

Stir until the mix turns into a well mixed glob of gooey stuff.

Decant off any excess liquid and remove the GAAKK from the Dixie Cup. Gently patch with piece of paper towel to remove excess Borax solution.

Enjoy the grossness of your creation!
